

Civil/Construction Engineer

A leading, locally-owned producer/supplier of asphalt, concrete and aggregates and asphalt/Sitework contractor in central Colorado is seeking a civil engineer. The successful candidate will have a minimum of a degree in civil/construction engineering from an accredited college or university. They will also possess experience with materials testing of asphalt, concrete and aggregates, and with experience estimating construction projects. The position will encompass testing, evaluation and problem solving in regards to asphalt, concrete and construction aggregates pertaining to mining, production and field placement, and will be lead estimator on civil construction projects. This position will likely also be the main sales contact and outside sales representative for the company.

If you are qualified, and are looking for a challenging & growing position, then this may be the position for you. The beautiful Colorado Rocky Mountains provide a scenic and serene environment offering activities such as fishing, hunting, hiking, biking, skiing, rafting and snowmobiling. The company offers a competitive salary commensurate with qualifications/experience; medical, dental and group life insurance; company matching 401K, and paid time off benefits.

If you are qualified and interested in this position, please email resume, cover letter and salary requirements to engineer.position@hotmail.com.
