

REBECCA L FIFE

SKILLS

I am an "Asphalt Woman". I have been trained and groomed most of my life to consult on geotechnical & construction materials in the lab and in the field on highway and airport construction projects throughout Colorado. I am a precise technician and excel as a consultant especially in *troubleshooting* situations. I consider no job too hard.

EXPERIENCE

Construction Materials Engineering Consultant / Administrator |

Western Colorado Testing, Inc. (WCT) | 1984-2006

Assisted my father, James R. Fife, in operating his family owned and operated consulting firm, in various testing and leadership positions. Achievement of and maintaining the companies **AASHTO Accreditation** was my responsibility, as was technical review, writing and submitting proposals and final reports. **Radiation Safety Officer, Equal Employment Opportunities Officer** and **Board of Directors Member** are of my additional titles held.

Quality Control Manager | Brannan Sand & Gravel | 1998

Responsible for Quality Control on all materials produced. My efforts in ensuring conformity of stockpiled materials, combined with my dedication to the company while working simultaneous night and day shifts, was instrumental in bonus pay achieved on I-70 nighttime paving operations

QC Testing/Wash-Plant Operator/Supervisor | United Sand & Gravel | 1991-1994

Responsible for Quality Control on all materials produced, initiated and implemented the companies' original QC Program, improving the company's profitability and reputation for quality products. Operated wash-plant and 980 Front End Loader producing top quality washed products for their concrete batch plant. Supervised crack-filling operations on Grand Mesa, Colorado.

CERTIFICATIONS (past & pending)

Radiation Safety Officer | **TROXLER**

Field/Lab Technician | **ACI**

LABCAT ABCE, Inspector (Recertification Jan. 2017) | **CAPA**

Safety-trained | **OSHA**

Liability IQ Certified | **Errors & Omissions Insurance**

OBJECTIVE

I wish to obtain an in-house laboratory or management position with opportunity for advancement, where I can contribute a lifetime of first-hand experience as a *Construction Materials Engineering Consultant*.

LEADERSHIP

Initiated the standardization of significant figures used for PWL Calculations on FAA Airport Paving Projects all over the United States. Change was made to the P-401 Specification following a meeting initiated by WCT, at my request, after having a conflict in test results on an airport paving project. I had performed a technical review and analysis of each set of test results and I proved I could manipulate pay factors based on how many significant figures were used throughout my calculations, it was documented and the federal specification was revised to eliminate future conflict.
